

# **SWINE FLU**

## **Update - 24-06-09**

**As the number of cases have increased in the UK, it is important to understand what to do if you suspect you have Swine Flu.**

**Firstly:**

**DO NOT ATTEND YOUR SURGERY.**

**\*Telephone the surgery and explain clearly to the receptionist that you suspect you may have Swine Flu.**

**\*She will arrange for a Doctor to phone you back as soon as possible.**

**\*Your Doctor will arrange for swabs to be collected from you and an appropriate prescription will be issued.**

**\*In the meantime do not leave the house and drink plenty of fluids.**

**It is important to BE PREPARED for this virus. Read the leaflet issued by the government and adhere to good personal hygiene practice.**
